

Pet Photography

We set up the photo shoot where your pets feel most comfortable - at home and in areas where they feel like themselves. We'll spend the first 10 minutes with a warm-up period where we and your pet(s) get to know one another - letting him/her sniff the gear and check things out. We'll make sure your pet is "photo ready" (quick brushing and checking for eye-goobers), and then we'll let your pet do what he/she does naturally while we take photographs.

We try to photograph your pets at their level. We go into their world and try to envision it from their point of view. We'll take images from a variety of different angles and perspectives, capturing the unique expressions and behaviors that show off your pet's personality, charm and character. We try to take most of the body shots from the side or front, rather than from above. This allows the images to look more natural. We also take close-up shots of your pet's face, from a side and three-quarter view as well as from the front.

Depending on the color and shading of your pet's fur, we may or may not do flash photos. We usually utilize a flash for black-furred animals, where the flash can highlight their fur color and texture. During a photo shoot, we try to avoid direct sunlight, as that can hide some of their features. A bright, overcast day works best. However, we will work with what we've got; and we do bring reflectors, in order to direct the natural and/or flash light needed for the photographs.

If your pet is not comfortable with the photographer or the camera, we may ask you to attract their attention and keep your pet visually engaged. We aim for action shots, goofy shots, mellow shots, and friendly shots of your pet(s) - to get images that capture their true nature.

***OUR AIM IS TO MAKE
THE PHOTO SESSION
A POSITIVE EXPERIENCE
FOR YOU AND YOUR PET.***

After the photo shoot, we go through post-production "darkroom techniques" - retouching, adjusting the contrast, dodging, burning, etc. This brings out the life in every photo we deliver.

For post-production imaging, the typical turn-around time is 10 days. (Orders can be processed faster, if need be, for an additional fee.) Proofs are then posted on the website for 60 days. You have 60 days from the time of posting to order your prints online. There is no minimum purchase, and you can choose as many images as you'd like. You make also call or email us to place your order.

We will send you an email when the images are posted. You can also order a proof CD (low resolution image previews) for an additional \$39. (The images on the CD can be used on a website or for a computer screen-saver or slideshow.) View the images and select which images you would like to have printed – selecting size, format, and any other products you would like to order.

To order prints, please select the style and size of print you want (by using the drop down menu on the screen). Click on "add to cart" and you'll be taken to a secure online payment page to complete your order.

Photo Session

We will bring:

Photography equipment

Property release for pet images

Model release

We ask:

Pet(s) be groomed before the photo shoot – so we can see their best side.

That you have your pet(s)'s favorite toys and treats available.

That you act how you usually do around your pet(s) – even if it's silly or takes funny faces or funny noises (we won't tell ☺).

For a signed property release and photo model release before the photo session begins. This gives us permission to use the photographs in our displays, brochures, portfolios, website and email promotions for Maria Barnowl Photography. Maria Barnowl retains copyright for all images.

Booking

To make an appointment, give us a call: (253) 209-9595 or send us an [email](mailto:Maria@MariaBarnowl.com) at Maria@MariaBarnowl.com.

Payment

We request payment for the photo session at the time of service.

For product orders, we request payment when you place your order.
